

Pneumatic universal butt fastening set 8, galvanized

Reference: PUV8-ST-SZ

Consists of:

2 Pneumatic universal butt fastener 8, GD-Zn,
galvanized

Cap screw DIN 912-M6x50, St, galvanized

Hexagon nut DIN 934-M6, St, galvanized

M = 14 Nm

m = 45.5 g

With butt fastening sets two same sized profiles can be assembled at the end faces. It is recommended to always use the connectors in pairs. The connector can be mounted quickly and easily by means of two stepped holes. The pneumatic variant offers the advantage that the cavities of the base profiles remain intact and the possibility of passing through or storing compressed air is retained. To seal the joint surfaces, additional pneumatic seals can be ordered.
