

Parallel fastener 8, galvanized

Reference: PV-8

Material: St  
Surface: galvanized  
M = 8 Nm  
m = 52.0 g

The pre-assembled parallel fastener 8 enables a friction-locked connection of two profiles touching each other with their slot sides. The profiles can be rotated and moved in any position. No further connection processing is required for assembly. The fastening screw of the fastener is tightened from the mating groove by a angle wrench AF4.
