

Face fastening set 8

Reference: PVSZ-8

Material: GD-Zn

Color: black

M = 20 Nm

m = 77.0 g

The face-fastening set 8 is used for interlocking angular connections between two profiles with facing groove sides. The crossing angle can be selected in 5° increments, using the interlock of the connector halves. For fastening to the profile groove, a button-head screw M8x25 and a T-slot nut 8 St M8 are recommended.
