

Radius seal 8 40x40, grey

Reference: RD8-40x40

Material: PA

Color: traffic grey similar to RAL 7042

m = 2.0 g

Radius seals enable a continuous transition of joints. The component is suitable to all fasteners of the modular system. Radius seals simplify cleaning and prevent the ingress of dirt, which is why they are particularly suitable for clean-room applications. As radius seals reduce the strength of constructions, it is recommended to double the safety factor while designing.
