

Castor rail 8 40x40, anodized (6 meters)

Reference: RS8-40x40-S6

Material: Aluminum, EN AW 6060 T66

Surface: anodized, A6, C0

Color: natural color

Length: 6000 mm

m = 1.28 kg/m

In the roller tracks 8 40x40 a wide variety of attachments can be used. The profile is compatible with all castor inserts D28, with ball castor inserts D16, with backstop inserts and with brush inserts. Furthermore the roller track can be used as a sliding guide strip. Sliding wedge inserts and ESD-compatible slide rails are available for this purpose. The cutting length of the castor rail should be matched to the 50 mm grid of the inserts.
