

Stop profile 8 20x18, black (20 meters)

Reference: AP8-20x18-R20

Oil- and water resistant

Hardness: 70 SH A

Material: NBR

Color: black

Length: 20 m

m = 240.0 g/m

The stop profile 8 20x18, black can be used as a stop for doors and as a lip seal to close gaps. The component is oil and water resistant and can be used in combination with all profiles of series 8. It is installed by pressing into the profile groove. When used as a lip seal, the height should be reduced under pressure by a maximum of 5 mm, so that a gap of at least 15 mm remains.
