

Knuckle foot D30 M6x58

Reference: S-D30-M6x58

Consists of:

Plate D30 PA, black

Threaded rod M6x40, St, galvanized

Hexagon nut M6, St, galvanized

Load: $F_{\max} = 1000 \text{ N}$

$m = 20.0 \text{ g}$

Knuckle feet are used for adjusting the height of tables and frames of any type. The height is infinitely adjustable. The inclination adjustment is ensured by a ball socket. A separately orderable rubber insert can be used to prevent displacement and to protect the floor.
