

Knuckle foot D40 M8x80

Reference: S-D40-M8x80

Consists of:

Plate D40 PA, black

Threaded rod M8x60, St, galvanized

Hexagon nut M8, St, galvanized

Load: $F_{\max} = 1500 \text{ N}$

$m = 42.0 \text{ g}$

Knuckle feet are used for adjusting the height of tables and frames of any type. The height is infinitely adjustable. The inclination adjustment is ensured by a ball socket. A separately orderable rubber insert can be used to prevent displacement and to protect the floor.
