

Knuckle foot D80 M12x160

Reference: S-D80-M12x160

Consists of:

Spindle, St, galvanized

Foot plate, GD-Zn, black, powder coated

Hexagon nut DIN 934-M12, St, galvanized

Load: $F_{\text{max}} = 10000 \text{ N}$

$m = 342.5 \text{ g}$

Knuckle feet are used for adjusting the height of tables and frames of any type. The height is infinitely adjustable. The inclination adjustment is ensured by a ball socket. A separately orderable rubber insert can be used to prevent displacement and to protect the floor.
