

## Sliding-door guide set 8/8, black

Reference: SFS-8/8

Consists of:

4 Sliders (2 x right, 2 x left), POM, black  
Spring pin, St, galvanized  
Spring, St, stainless steel  
m = 45.5 g

The sliding-door guide set 8/8 is used for the construction of sliding doors in conjunction with the clamp profile 8 32x18. One guide set is required per door. They are fixed by snapping into the spring bolt in the Ø 7 mm mounting hole of the clamp profile connection set 8 32x18. For constructions with door elements of the same size, the following formula applies to the profile length:  $l = (L+32x(n-1)-8)/n$ . The lateral protrusion of the caps of 4 mm is on this occasion considered. The doors may weigh a maximum of 10 kg.
