

Standard-fastening set 8 K

Reference: SV-8-K-SZ

Consists of:

Spacer, POM, black incl. washer, St, galvanized
button-head screw M8x20, galvanized

M = 25 Nm

m = 12.0 g

The standard-fastening set 8 K is used when panel elements are inserted into the profile groove. The advantage of the connector is that additional cut-outs on surfaces are not required. From the outer edge of the profile, a connection machining (supply hole) with $D = 7.0$ mm at a distance of 20.0 mm is necessary.
