## **DATA SHEET**

## LED-light 1782-96

Reference: SYSTEMLED-1782-96

Cover: Microprisms Length: 1782 mm Power: 96 Watt Protection class: IP50, protection class 1 Light color: Daylight white 5,200K - 5,700K Beam angle: 100° Connection: 230V - AC (GST18) m = 6.8 kg

The robust LED-light is specially designed for system workstations. It is connected via the standard GST18. The power supply unit (230V) is installed directly into the LED-light. In addition, the light offers homogeneous, glare-free and flicker-free illumination. From an economic point of view, it is particularly energy-efficient. The LED-light is also designed for 60,000 operating hours and is also maintenance-free. An on/off switch is attached to the housing. The LED-light can be easily mounted on the profile groove using a separately orderable <u>fastening set</u>. Suitable connection cables are available.
