

Transport castor TR50, bearing set

Reference: TR-50-LS

Consists of:

2 Bearing flanges, PA-GF, black, ball-bearing

2 Bolts, St, galvanized

2 Fixation pieces, PA-GF, black

Load: $F_{\max} = 1000 \text{ N}$

$m = 250.0 \text{ g}$

Bearing set for transport castor TR50 for solving transport tasks. The bearing sets have spring-loaded fastening spigots and can be retrofitted into existing constructions. The axial position of the castor is fixed using two mounting pieces.

The bearing sets are pressed onto a tube D50 Al. A pillar drilling machine is suitable for pressing, the bearing journal should not be strained during pressing.
