

Uni multiblock 6 PA, black

Reference: UKB6

Gap dimension = 5.0 mm (circumferential)

Consists of:

Base body and notch

Material: PA-GF

Color: black

m = 7.0 g

The uni terminal blocks are used for simple installation of light surface elements. The terminal block can be installed and locked into existing constructions using the insert-rotate-principle at a later time. The surface element is mounted using an attachment clip. Different position of the stop surfaces enable variable installation options.
