

Universal-fastener 5, galvanized

Reference: UV5

Material: GD-Zn

Surface: galvanized

M = 3 Nm

m = 3.0 g

The universal-fastener is a friction-locked, right-angled connection which offers the possibility of adjusting profile struts. It is optimally suited for the installation of profiles in existing constructions. The fastener can be installed quickly and easily by means of a stepped hole. For highly stressed joints, it is recommended to use the universal connectors in pairs.
