

Connecting cable 3m for multi-socket power strip / light socket-earthed plug

Reference: ASL-BSCH-SSL

Technical data:

Total length: 3m

Type: GST18I3, 3-pole; 250V / 16A

Cable: H05V2V2-F 3G1,5

Protection class: IP20

Color: black

m = 384.5 g

The connection cable can be used to establish the power supply to a socket outlet with protective contact. The connection cable has a Schuko plug on one end and a GST18/3 socket on the other end. The socket can especially be used to supply system sockets or SystemLED lamps. The GST18 standard offers the advantage of a VDE compliant plug connection. Time-consuming wiring of the supply line is no longer necessary and terminal devices can be connected quickly and safely.
