

Stiffening bracket 80x180

Reference: VW8-80x180

Material: GD-Al

Surface: painted

Color: aluminum colored

m = 681.0 g

The stiffening bracket 80x180 enables a strong, force locked and machining-free connection. It can be used as an additional reinforcement of connections and as a fastening element for various attachments. Furthermore, it can be used to firmly connect aluminum profiles to the floor. It is mounted to the profile grooves using additionally orderble cap screws and T-slot nuts M8.
